

Statistics Committee
5th Meeting
6 March 2013
London, United Kingdom

**Exports of all forms of coffee
to exporting countries
Calendar years 2000 to 2012**

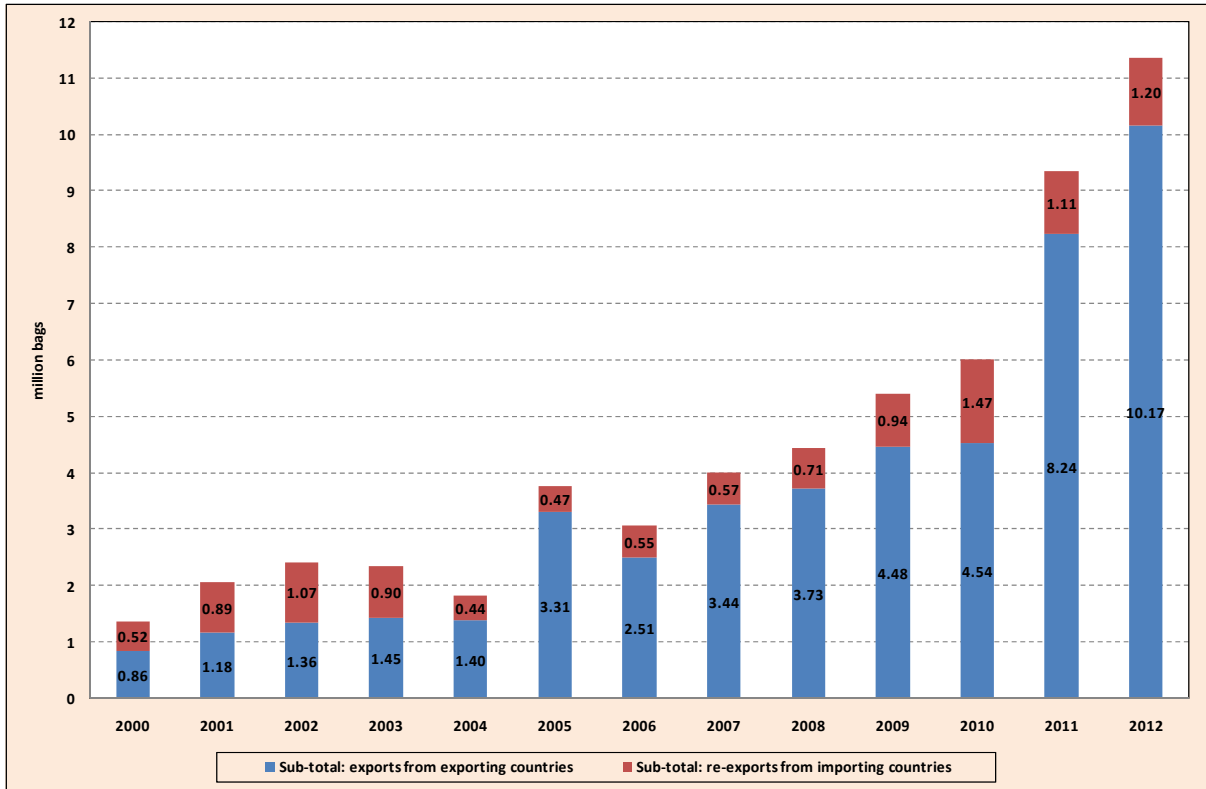

Background

1. With the entry into force of the ICA 2007 in February 2011, exporting Members are now required to provide monthly information on the volume and value of imports of coffee by form and type, and by origin. The information presented in this report is based on data collected from a variety of sources. Some exporting Members may experience delays in collecting this information as they may have to contact their Customs Authorities and/or Central Banks to obtain these reports.
2. Table 1 shows the volume of exports to exporting countries in calendar years 2000 to 2012 by origin. Graph 1 shows the volume of total exports of all forms of coffee to exporting countries as the declared final destination by exporting and importing countries. In the case of some exporting and some importing countries, data for 2012 may have been estimated.
3. In the first half of the period covered in this report, 71% of the exports originated in exporting countries. This share increased to over 89% in 2012. The total volume exported to exporting countries in 2012 is estimated to reach 11.4 million bags, 21.6% higher than that exported in 2011.
4. The top 10 exporting countries, declared as the final destination for the exports with volumes higher than 100,000 bags green bean equivalent in 2012 are: the Philippines, Colombia, Venezuela, Indonesia, Mexico, Ecuador, India, Vietnam, Cuba and Thailand – see Table 2. Graph 2 shows the share of these countries in the total imports in 2012.
5. Data on exports to this segment of the market will become more reliable when exporting Members fully implement the new Rules on Statistics – Statistical Reports, contained in document ICC-102-10, by providing reports on their imports of coffee.
6. The Organization will continue to monitor the exports to exporting countries.

Action

The Statistics Committee is requested to take note of this document.
