development strategy more beneficial to society as a whole—women and men alike— than one which involves women as central players. **No other policy is as likely to raise economic productivity, lower infant and maternal mortality or improve nutrition and promote health. When women are fully involved, the benefits can be seen immediately:** families are healthier; they are better fed; their income, savings and reinvestment go up. And what is true of families is true of communities and, eventually, whole countries.”

- Kofi Annan, UN Secretary General 1997-2006, 2001 Peace Noble prize award
