Statistics Committee
26th meeting
16 March 2009
London, England

**Exports of all forms of coffee
to exporting countries
Coffee year 2007/08**

Background

1. Information on the volume and value of imports of coffee by exporting Members is requested to be provided on a monthly basis, when available, by form of coffee and by origin.
2. In coffee year 2007/08, only three exporting Members have submitted to the Organization reports on their imports of coffee either with monthly or annual data. Delays in meeting this request are usually due to the need to obtain the information from the Customs Authorities and/or Central Banks.
3. In September 2008, the Council approved the Committee's recommendation to make it compulsory for exporting Members to provide monthly reports on their imports of coffee. When the new Agreement comes into force, compliance by exporting Members with this obligation will be reported to the Committee on a regular basis.

Action

The Statistics Committee is requested to take note of this document.

EXPORTS OF ALL FORMS OF COFFEE TO EXPORTING COUNTRIES COFFEE YEAR 2007/08

1. Table 1 shows the volume of total exports of all forms of coffee to exporting countries by declared destination from all origins for coffee years 2003/04 to 2007/08. Similarly, Table 2 gives the volume of exports by origin in the same period. It should be noted that, as information on re-exports by importing non-members is not yet available for calendar year 2008, estimates have been made on the basis of the volume of their re-exports in 2007. In addition, estimates have also been made for some exporting Members that have been exporting coffee to exporting countries in recent years but are still to provide data for the whole of coffee year 2007/08.

2. The volume of coffee imports from all origins in coffee year 2007/08 as declared by exporting countries reporting this information amounts to just below 704,000 bags. The volume of reported imports as declared by exporting countries as a percentage of the volume of the declared exports to exporting countries from all origins (19%) shows that most exporting Members are yet to declare their imports of coffee to the Organization. Table 3 shows the volume and percentage share of coffee exported to exporting countries by form of coffee. This table also shows that 67% of coffee exported to exporting countries is green and 33% is processed (roasted and soluble).

3. In coffee year 2007/08, 3.73 million bags of coffee were exported to exporting countries. Ten of these exporting countries, as the declared destination, account for over 87% of this volume – equivalent to 3.26 million bags. Table 4 provides additional information about the coffee exported to these 10 countries in coffee year 2007/08. Table 5 shows similar information for the top 10 origins of coffee exported to exporting countries.

4. The graph below shows the volume of coffee exported to exporting countries from coffee year 1996/97 to 2007/08. It also shows the trend of these exports, which historically have risen from 662,465 bags in 1996/97 to 3.73 million bags in 2007/08.
