

International Coffee Organización Internacional del Café Organização Internacional do Café Organisation Internationale du Café 19 January 2007 Original: English

Executive Board 263<sup>rd</sup> Meeting 24 and 26 January 2007 London, England Progress report on the implementation of the Coffee Quality-Improvement Programme (CQP) – January 2007

# Background

1. The promotion of quality as a means to enhance sustainability of the coffee economy by increasing consumption, by adding value and providing consumer satisfaction is a primary target of the Coffee Quality-Improvement Programme – CQP – (see document ICC-90-9). Exporting and importing Members have continued their commitment to improving quality through the CQP which was adopted in its current form when Resolution number 420 was approved by the Council in May 2004

2. In accordance with the Resolution, exporting Members are requested, should they wish, to indicate in box 17 of all Certificates of Origin issued from 1 June 2004, information on the quality of the coffee exported by defects and moisture content. This allows the Organization to monitor the level of compliance with the target standards based on the data received.

3. This document contains information for coffee year 2005/06 – (October 2005 to September 2006), of the London International Financial Futures and Options Exchange (LIFFE) Robusta gradings and for NYBOT Coffee "C" Gradings. It also contains information on progress on implementing the CQP under the provisions of Resolution number 420 in exporting Member countries in the same period based on data extracted from Certificates of Origin in the same period and, to the extent possible, in previous coffee years for comparison purposes. The previous report on the CQP is contained in document WP-Board No. 1011/06.

### Action

The Executive Board is requested to take note of this report.

## PROGRESS REPORT ON THE IMPLEMENTATION OF THE COFFEE QUALITY-IMPROVEMENT PROGRAMME (CQP) JANUARY 2007

1. Following the adoption of Resolution number 420 by the Council, exporting Members have been requested to voluntarily indicate on Certificates of Origin information on the quality of green coffee exports. The Organization has been monitoring information received from these Members on all shipments that have taken place from 1 June 2004 – when the Resolution came into effect. This report concentrates on information related to shipments in coffee year 2005/06 (October 2005 to September 2006) – which may vary from country to country in accordance with the data received. Some statistics are also given since the Resolution came into effect in June 2004 so that progress on its implementation may be assessed.

2. Since the last report on this matter, Malawi is the latest country to implement Resolution number 420. There are now 25 exporting Members – Angola, Bolivia, Brazil, Burundi, Cameroon, Colombia, Costa Rica, Democratic Republic of Congo, Dominican Republic, Ecuador, El Salvador, Ethiopia, Guatemala, Honduras, India, Jamaica, Malawi, Mexico, Nicaragua, Papua New Guinea, Philippines, Rwanda, Tanzania, Togo and Zambia – who have been informing the Organization of the quality of their green coffee exports since the Resolution was introduced in these countries. Annexes I and II give details of the exports of all green coffee – with breakdown between Arabica and Robusta, respectively – by the countries complying with the provisions of Resolution number 420, in volume and its equivalent percentage. It should be noted that in the period covered by this report, data may not have been received from all the exporting Members listed. Graph 1 shows progress in participation on the CQP since its initial implementation in October 2002 (Resolution number 407)<sup>1</sup>.

3. Graph 2 shows the total volume of green coffee exported by all exporting countries from 2003/04 to 2005/06 based on Certificates of Origin received by the Organization, compared with the volume of the green coffee in total compliance with the quality standards (classified under "S") and the coffee with quality unspecified. This shows a continued improvement in the percentage of "S" classified coffee of the total exported from 31.6% in 2003/04; to 69.2% in 2004/05 and 73.1% in 2005/06.

4. The Organization continues to monitor the daily gradings for Robusta coffee carried out by LIFFE since April 2001 at most European ports. Annex III contains a summary of these gradings – classified by LIFFE under types 3, 4 and untenderable, in accordance with its grading system, which are deemed to fall below the ICO target standards – by port and by origin during 2005/06. The volume of coffee graded by LIFFE which was deemed to have

<sup>&</sup>lt;sup>1</sup> *Resolution number 420 introduced some more specific albeit voluntary requirements.* 

failed to comply with the targets of Resolution number 420 in this period amounted to 1.49 million bags. Of this total, over 53% failed the grading analysis in Antwerp and over 72% was exported by Vietnam. This compares with 1.88 million bags that failed gradings in 2004/05, representing a decrease of just over 20% in failed gradings from last year. Graph 3 shows the volume of coffee graded by LIFFE (classified under 0, 3 and 4 grades) from coffee year 2002/03 to 2005/06. This also shows a steady decline in the lower gradings.

5. Regular reports on the Coffee "C" contract grading analysis are posted on the New York Board of Trade (NYBOT) website showing the monthly summary and year to date results on the pass/fail results by origin. Coffee which has been graded and failed may be submitted to an appeal grading for cup, colour, grade and other imperfections such as odour and/or bean size. The reports indicate that in coffee year 2005/06 over 80% of the coffee graded by NYBOT (81% on the original grading and an additional 19% on appeal) passed the grading analysis – see Annex IV for details.

6. During coffee year 2005/06, the volume of green coffee exported by the 25 Members implementing the Resolution amounted to 54.4 million bags of which over 49.8 million bags were Arabica (just under 92%) and nearly 4.6 million bags were Robusta (over 8%). Of this total, 51.9 million bags were in full compliance with the Resolution (over 95%), of which 47.8 million bags were Arabica and 4.1 million bags were Robusta. The total volume exported by the 25 exporting Members in 2005/06 is equivalent to over 66% of the exports of green coffee by all exporting countries.

7. The figures for Robusta coffee continue to cause some concern, although the reduction in lower qualities graded by LIFFE is encouraging. The Organization will continue to monitor LIFFE and NYBOT gradings as well as compliance with Resolution number 420 by exporting Members based on data extracted from Certificates of Origin.

# Exports of all green coffee classified in accordance with Resolution number 420 Coffee year 2005/06

## NYBOT: Coffee "C" gradings summary analysis OCTOBER 2005 TO SEPTEMBER 2006

			Orig	ginal		Appe	als	
	Pass	Fail	Total	Pass %	Pass	Fail	Total	Pass %
Grade	5 660	505	6 165	91.81%	1 644	160	1804	91.13%
Cup	4 464	1 701	6 165	72.41%	1 141	663	1 804	63.25%
Colour	6 006	159	6 165	97.42%	1 769	35	1 804	98.06%

ORIGINAL GRADING: These statistics for original gradings are based on individual grading of cup, colour, grade and other imperfections such as odour and/or bean size graded between 01/10/05 and 31/03/06

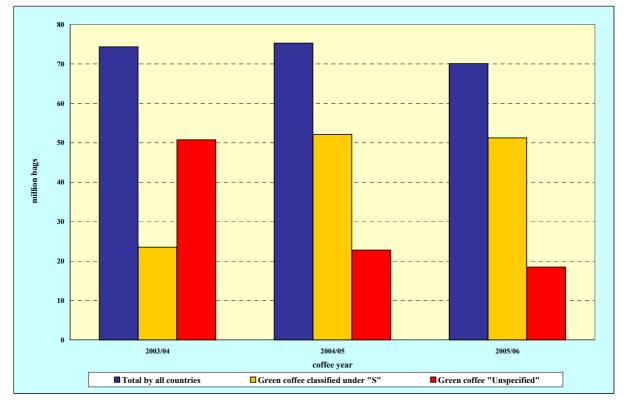

APPEAL GRADING: The owner of the coffee submitted as an original grading may appeal for any decision of the graders, for cup, colour, grade and any other imperfections such as odour and/or bean size and represents appeal gradings between 01/10/05 and 31/06/06 regardless of the date of original grade.

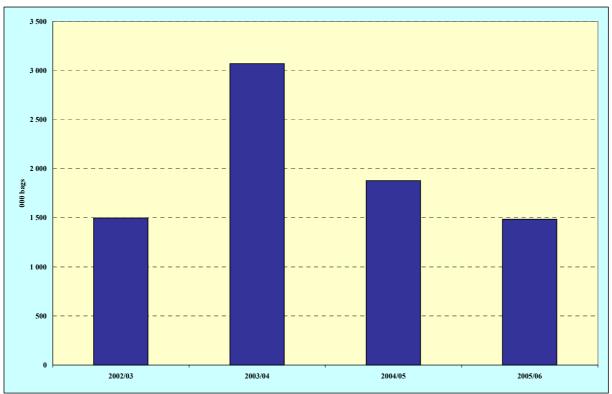

Note from ICO: Date format converted to dd/mm/yy
