**Exports of all forms of coffee to
exporting countries
October 2007 to June 2008**

Background

1. When exporting Members import coffee, they are requested to provide information on total imports by month, by form of coffee and by origin. In recent months, a few exporting Members have responded to requests from the Organization by providing reports on their imports of coffee by origin and by form. Delays in responding to our request might be due to the need to consult with the Customs Authorities and/or Central Banks in order to obtain the information.
2. Table 1 shows data on the volume of exports and re-exports of all forms of coffee to exporting countries as declared by exporting and importing countries for the first 9 months of coffee years 2005/06 to 2007/08¹. Table 2 gives this information for the same period by destination.
4. The volume of coffee imports from all origins from October 2007 to June 2008 as declared by the exporting countries reporting this information amounts to less than 250,000 bags. The volume of reported imports as declared by exporting countries as a percentage of the volume of the declared exports to exporting countries indicates the discrepancy of data between the two sources.
5. Six exporting countries, which appear as the final destination of the coffee exported thereto with a significant volume from all origins, namely Cuba, Ecuador, India, Indonesia, Mexico and Philippines, have yet to provide the Organization with reports on their imports. From October 2007 to June 2008, together they account for nearly 73% of the declared exports from both importing and exporting countries.

Action

The Statistics Committee is requested to analyse the information presented in this document and to make the appropriate recommendations for action.

¹ Data from both exporting and importing countries are incomplete for the period covered in this report.
