LETTER FROM THE EXECUTIVE DIRECTOR

## Coffee Market Report

October 2004

In this month's Letter I shall be presenting a more concise Coffee Market Report in order to avoid needless repetition. Coffee prices, particularly in the case of Arabicas, rose slightly during October, confirming the improvement noted in September 2004. Market fundamentals continue to favour an upward trend in Arabica prices since prospects of a reduced supply in many exporting countries have become clearer. In the case of Robustas, however, prices have fallen slightly. This is reflected in the price differential with Other Milds, with the average price in October at 80.55 US cents/lb compared to 31.67 US cents/lb for Robustas, representing a differential of 48.88 US cents/lb, which is the highest since June 2000. This report includes information on the situation of coffee consumption in the southern European countries (Greece, Italy, Portugal and Spain).

## Price movements

Despite the increase in Arabica prices, the monthly average of the ICO composite indicator price fell slightly, down to 61.10 US cent/lb in October compared to 61.47 US cents/lb in September 2004. In daily terms, prices during the first two weeks of November seem to have recovered the firm trend noted in September ${ }^{1}$. Graph 1 shows daily movements in the ICO composite indicator price in 2004.

Graph 1: Daily composite indicator price 5 January - 5 November 2004

[^0]Table 1 shows ICO indicator prices and average prices on the New York and London futures markets. The monthly average of the ICO indicator price for Colombian Milds was 83.02 US cents/lb in October compared to 81.02 US cents $/ \mathrm{lb}$ in September, representing an increase of $2.47 \%$. This is the highest level recorded since December 2000. Compared to January 2004, the October average represents an increase of $12.55 \%$. The monthly average of the ICO indicator price for Other Milds remained relatively stable at 80.55 US cents/lb in October compared to 80.47 US cents/lb in September. Compared to January 2004, the October average represents an increase of $10.75 \%$. The monthly average of the ICO indicator price for Brazilian Naturals was 69.91 US cents/lb in October compared to 68.90 US cent/lb in September,
representing an increase of $1.47 \%$. Compared to January 2004, the October average represents an increase of $12.65 \%$. The ICO indicator price for Robustas was down by $7.51 \%$, from 34.24 US cents/b in September to 31.67 US cents/lb in October. Compared to the level recorded in January 2004, this represents a fall of $20.51 \%$. The London futures market (LIFFE), which reflects the situation of Robustas, fell by $7.81 \%$ compared to the average for September and by $21.47 \%$ compared to January 2004. The New York futures market, which is sensitive to the situation of Arabicas, fell by $0.72 \%$, from 80.37 US cents/lb in September to 79.79 US cents/lb in October. Compared to January 2004 there was an increase of $6.59 \%$. Graphs 2 to 5 show movements in daily indicator prices for the four coffee groups in 2004.

## Market fundamentals

Factors related to supply and demand have remained unchanged since the last monthly report (Letter from the Executive Director, September 2004). Crop year 2004/05 has already begun but it is still too early to speak of the arrival of new crop coffee on the market. My estimates of total production remain unchanged, with a figure ranging between 112 and 114 million bags. With regard to Brazilian production for crop year 2005/06, which begins in April 2005, we must await preliminary official estimates to be published in December 2004 for more precise figures.

Total exports during coffee year 2003/04 (1 October 2003-30 September 2004) were 87.49 million bags, representing a fall of $0.71 \%$ compared to the total of 88.11 million bags for coffee year 2002/03 (Table 2). During the period under consideration, Robusta exports increased by $1.78 \%$ and exports of Brazilian Naturals by $1.43 \%$. On the other hand, exports of Colombian Milds fell by $4.07 \%$ and exports of Other Milds by $4.81 \%$. At the regional level, exports from the Asia/Oceania region increased by $15.75 \%$ while those of the other regions fell: South America by $7.27 \%$, Africa by $3.68 \%$ and Mexico \& Central America by $3.40 \%$. Information on the effect of these changes in exports on export earnings will be provided in my next Coffee Market Report. In the meanwhile it should be noted that total exports of Arabica fell by $1.99 \%$ while total Robusta exports increased by $1.78 \%$ compared to coffee year 2002/03.

Table 2: Exports
Coffee years 2002/03 and 2003/04

|  | 2002/03 | 2003/04 | \% variation |

In million bags

Stocks of green coffee in importing countries, including free ports, have remained unchanged at the level of 20.09 million bags recorded in September 2004. There have been a number of changes in the volume of certified stocks in the London (LIFFE) and New York (NYBOT) futures markets (Table 3).

Table 3: LIFFE and NYBOT certified stocks

| End of | LIFFE | NYBOT |
| :--- | ---: | ---: |
| Oct-03 | 2.42 | 4.47 |

| In million bags |  |  |

Data on opening stocks for crop year 2004/05 are not yet available in exporting countries. In crop year 2003/04 the volume of stocks was 22.07 million bags.

World consumption is estimated at 113.08 million bags for calendar year 2003. Of this total, an amount of 27.87 million bags is accounted for by exporting countries and 85.1 million bags by importing countries.

The following section provides information on consumption in the importing countries of southern Europe (Greece, Italy, Portugal and Spain).

## Consumption in Greece

With a total population of 11 million inhabitants in 2003, Greece has been steadily increasing its coffee imports over the last ten years. Total consumption was 1 million bags in 2003 compared to 865,000 bags in 2002. Unconfirmed per capita consumption figures indicate that there has been some increase, with the average for 2003 at 6.01 kg compared to 5.18 kg in 2002. The average for the last four years (2000-2003) was 4.73 kg compared to 2.83 kg for the period 1990-93. Imports totalled 1.07 million bags in 2003, of which only 70,000 bags were re-exported. The main origins of the country's green coffee imports in 2003 were: Brazil, Vietnam, India, Colombia and Ethiopia.

## Consumption in Italy

Italy, which has a population of 60.2 million inhabitants, has become Europe's second largest market, ranking below Germany and above France. Consumption totalled 5.50 million bags in 2003 compared to 5.42 million bags for France and 9.13 million bags for Germany. The Italian market has grown steadily over the last ten years: from an annual average of 4.53 million bags in 1990-93 to 5.27 million bags in 2000-2003. Per capita consumption was 5.73 kg in 2003 compared to 4.93 kg in the 1990s. Imports of green coffee totalled 6.95 million bags in 2003 and re-exports totalled 1.45 million bags. It should be noted that in Europe this volume of re-exports is exceeded only by Germany ( 6.7 million bags) and Belgium/ Luxembourg ( 2.2 million bags). The main origins of the country's green coffee imports in 2003 were; Brazil (38.06\%), Vietnam (13.02\%), India (10.96\%), Indonesia (5.91\%), Uganda (5.32\%) and Cameroon (3.34\%). Robustas accounted, on average, for around $36.50 \%$ of imports during the last three years (2000-2003) compared to $43.40 \%$ in 1990-93. During the same period, the share of Arabicas increased from $52.46 \%$ to $54.65 \%$. However, the share of Colombian Milds in Italian imports fell by $3.33 \%$. The annual average of the retail price rose to 546.72 US cents in 2003 compared to 457.12 US cents in 2002 but the level of taxation is very high and is likely to have an effect on consumption. There is a value-added tax of $20 \%$ on green coffee and roasted coffee and $10 \%$ on soluble coffee.

## Consumption in Portugal

Portugal had an average per capita consumption of 4.34 kg in 2003 for a total population of 10.4 million inhabitants. Total consumption was 745,000 bags in 2003. Imports totalled 855,000 bags in 2003 , of which 110,000 bags, representing $12.86 \%$ of this total, were re-exported. The main origins of the country's imports in 2003 were: Brazil (17.4\%), Uganda (10\%), Côte d'Ivoire (8.9\%), India (8.7\%),

Vietnam (8.7\%), Cameroon (7.1\%) and Honduras (6.6\%). Robustas accounted for $41 \%$ of total imports in 2003 compared to $48 \%$ for Arabicas. No breakdown is available for the remaining imports. Retail prices increased from 385.32 US cents/lb in 2002 to 455.63 US cents/lb in 2003. The only tax on coffee is value-added tax at $12 \%$.

## Consumption in Spain

Consumption in Spain totalled 2.82 million bags in 2003, a relatively low level for a country with a total population of 41.3 million inhabitants. Per capita consumption was 4.21 kg in 2003. Imports of green coffee totalled 4.21 million bags in 2003, of which 1.38 million bags were re-exported. The country's main suppliers of green coffee in 2003 were: Vietnam (25.4\%), Brazil (22.3\%), Uganda (13.1\%), Colombia (7.3\%) and Côte d'Ivoire (6.2\%). Robustas accounted on average for $56.3 \%$ of total imports in 2003 compared to $43.7 \%$ for Arabicas. Retail prices rose from 258.11 US cents/lb in 2002 to 300.07 US cents/lb in 2003. The only tax on coffee is the value-added tax of $7 \%$.

The annex table contains data for the period 1965 to 2003 on imports, re-exports, retail prices and per capita consumption in the four countries referred to above.

In conclusion, I would like to note that the improvement in the market recorded in September continued in October even though the situation of Robustas continues to give cause for concern. Information from the main Robusta exporting countries has given rise to strong downward pressures on prices for this group. More accurate estimates on the size of crops in crop year 2004/05 will permit a proper evaluation of the situation of supply. I think there is reason to believe that the worst of the crisis is over although we must continue our efforts in regard to quality improvement and the promotion of an increase in consumption in order to assure satisfactory incomes for coffee producers.

| Volume of imports and re-exports of all forms of coffee (in 000 bags); Average retail price of roasted coffee (US cents/lb) and per capita consumption (p.c.c.) in kilogram in four selected E.U. countries <br> Calendar years 1965 to 2003 |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
